

Nemanja Đorđević

I'm a frontend developer with a passion for building beautiful, user-friendly websites. In addition to the frontend, I also understand a bit of backend development and am excited to use my skills in a professional environment. I learn quickly and am a team player. I am confident that I can be a valuable asset to any web development team

2011-2015

Work History

🔧 Frontend developer | Frelancer

2022 – Present

Creation of web sites for clients

Project

- 🏆 [europetraveling](#) – Site about traveling
- 🏆 [workwood](#) – Site about workwood products
- 🏆 [catering](#) – Site about catering
- 🏆 [hotels](#) – Site about hotels agency

References

👤 Milan Josipovic – Fullstack developer

Nemanja Djordjevic successfully completed a course called Web Basics for Beginners, organized by the Regional Innovation StartUp Center from Uzice. The course included introducing students to the basic technologies: HTML, CSS and Javascript, as well as accompanying technologies: Bootstrap, Git, site hosting and practical work on projects with real clients. The goal was for participants to gain real hands-on experiences with theoretical support. Nemanja showed initiative and stood out during the joint work on projects with other participants (colleagues). Nemanja and his fellow participants were part of the team that conducted an interview with the client, defined the client's requirements, which were then translated into tasks and resulted in the final completed projects. Two projects were done: – Free Cafeteria – Oilyata In addition to basic technical skills, Nemanja showed understanding and application of so-called soft skills. As a lecturer, it was very pleasant for me to work with Nemanja as with my future colleague. I am also very glad that Nemanja did not stop learning after finishing the lecture, but after finishing the course he continued to study and create independently. Due to all the above, I sincerely recommend Nemanja for a job in your company. If you have any additional questions, please email me: milan.josipovic@protonmail.com. You can also contact me by phone: +381613255052. I wish you all the best
